

Appendix B

Figures 2-1

Through

Figures 2-20

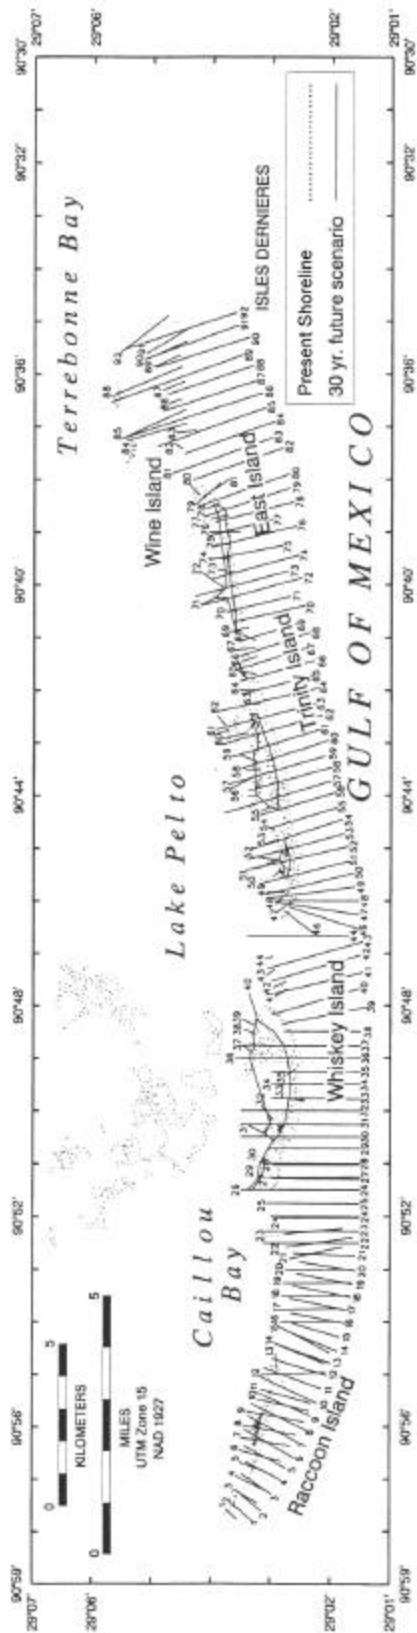

Figure 2-1. Shore-perpendicular transects along the Isles Dernieres barrier island system.

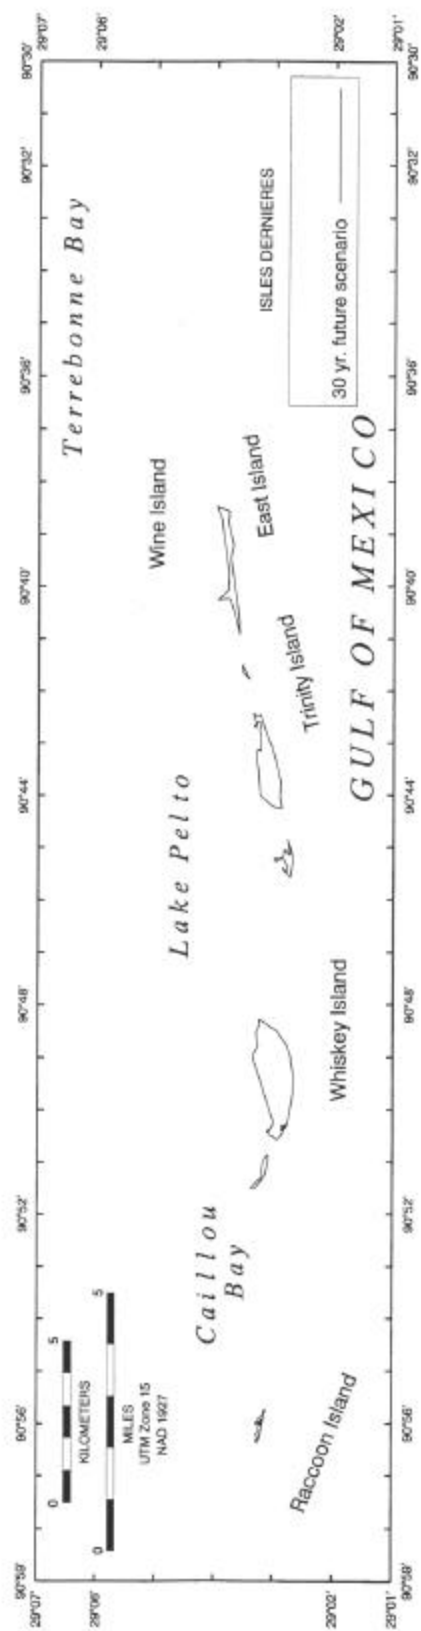

Figure 2-2. Isles Dernieres shoreline projected 30-years into the future.

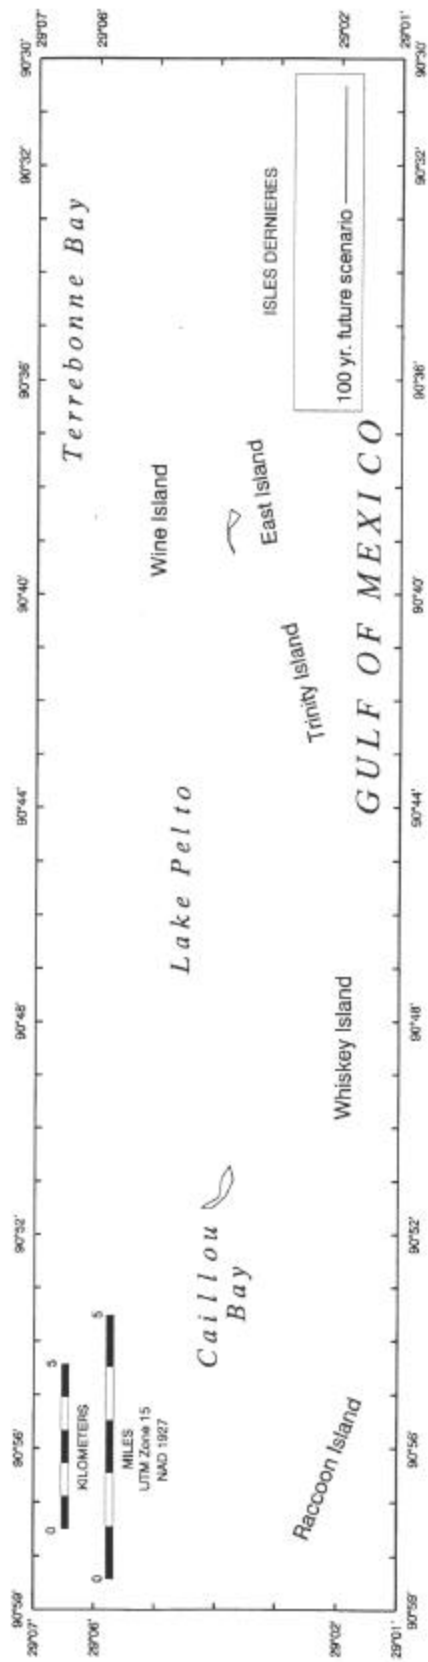

Figure 2-3. Isles Dernieres shoreline projected 100-years into the future.

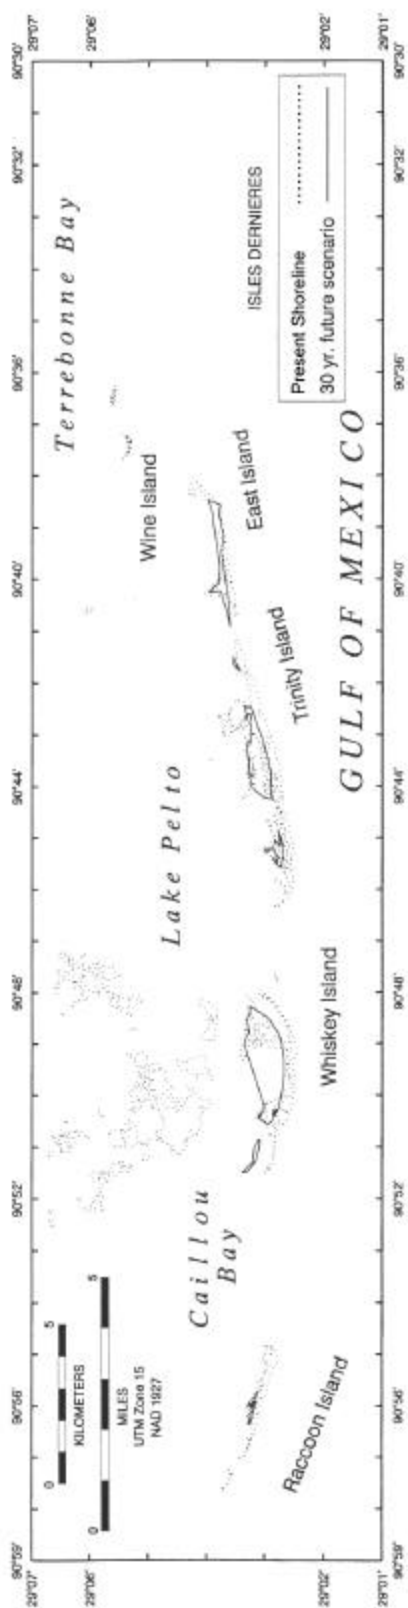

Figure 2-4. Isles Dernieres barrier island system showing 30-year future shoreline superimposed on present shoreline.

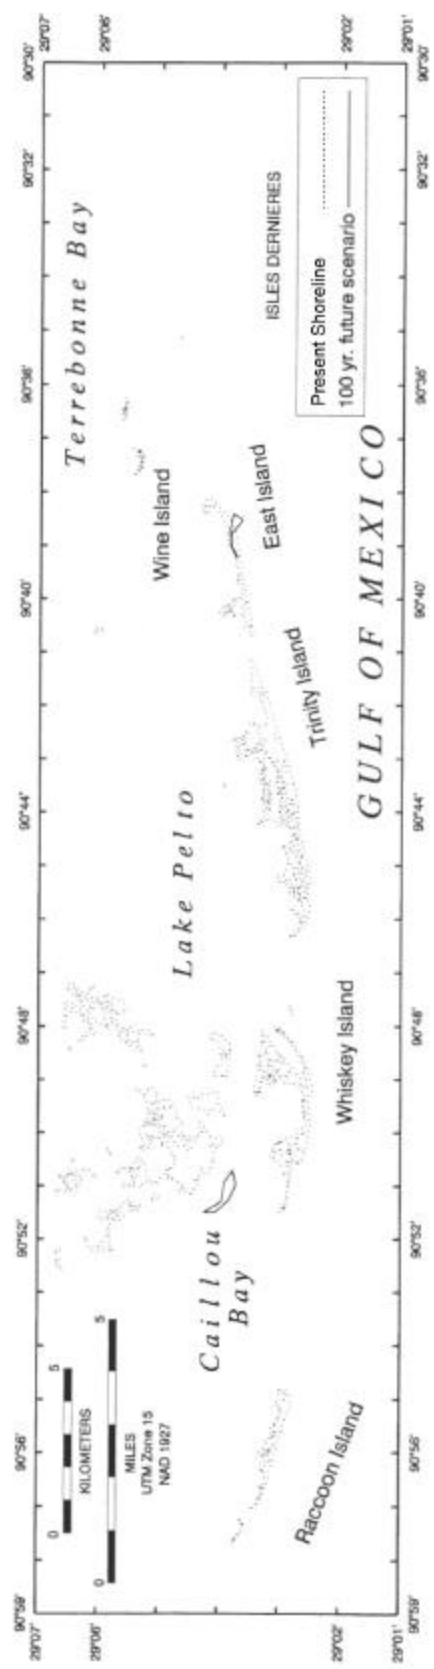

Figure 2-5. Isles Dernieres barrier island system showing 100-year future shoreline superimposed on present shoreline.

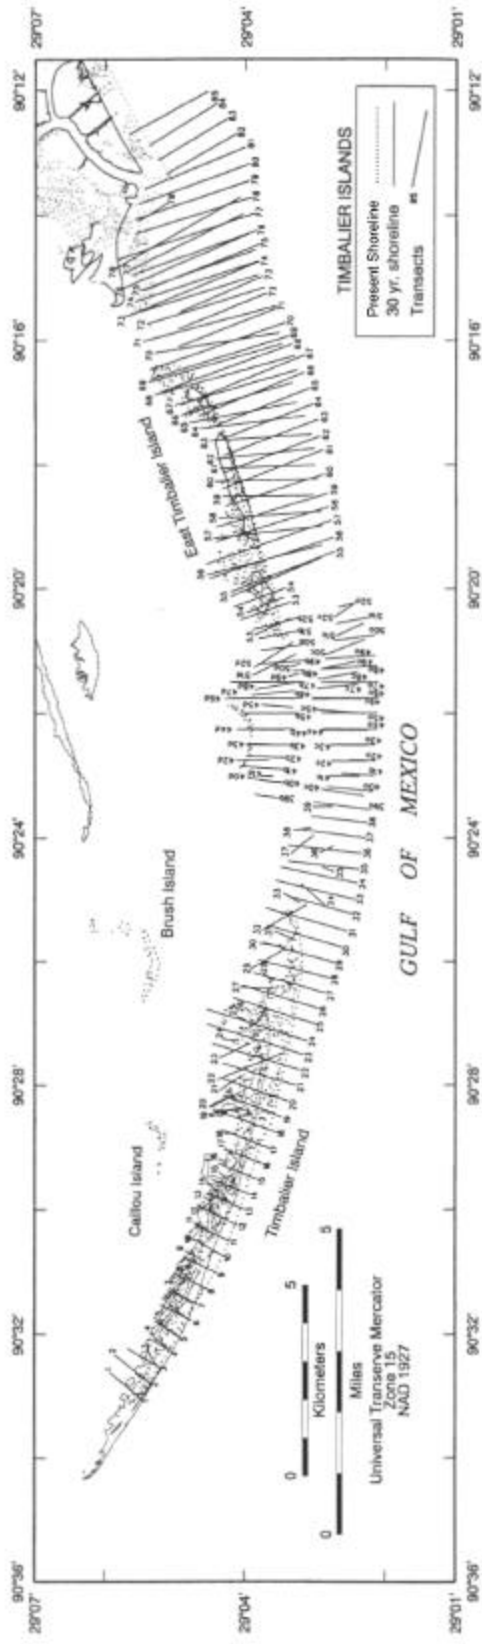

Figure 2-6. Shore-perpendicular transects along the Timbalier Islands barrier system.

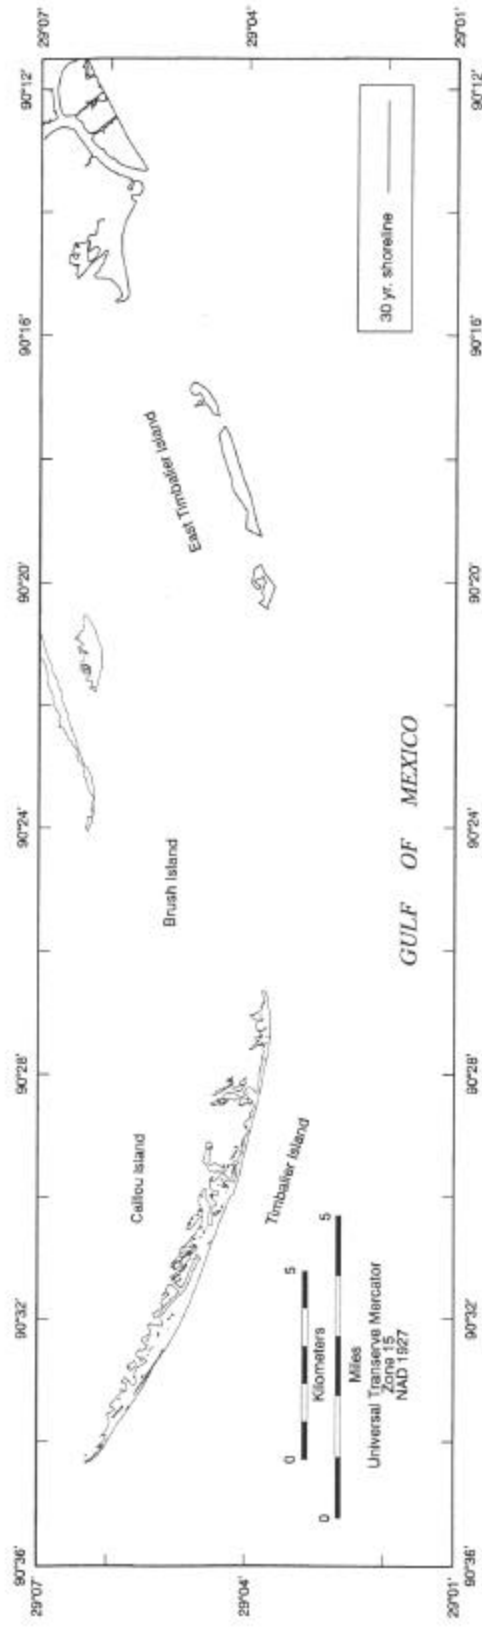

Figure 2-7. Timbalier Islands shoreline projected 30-years into the future.

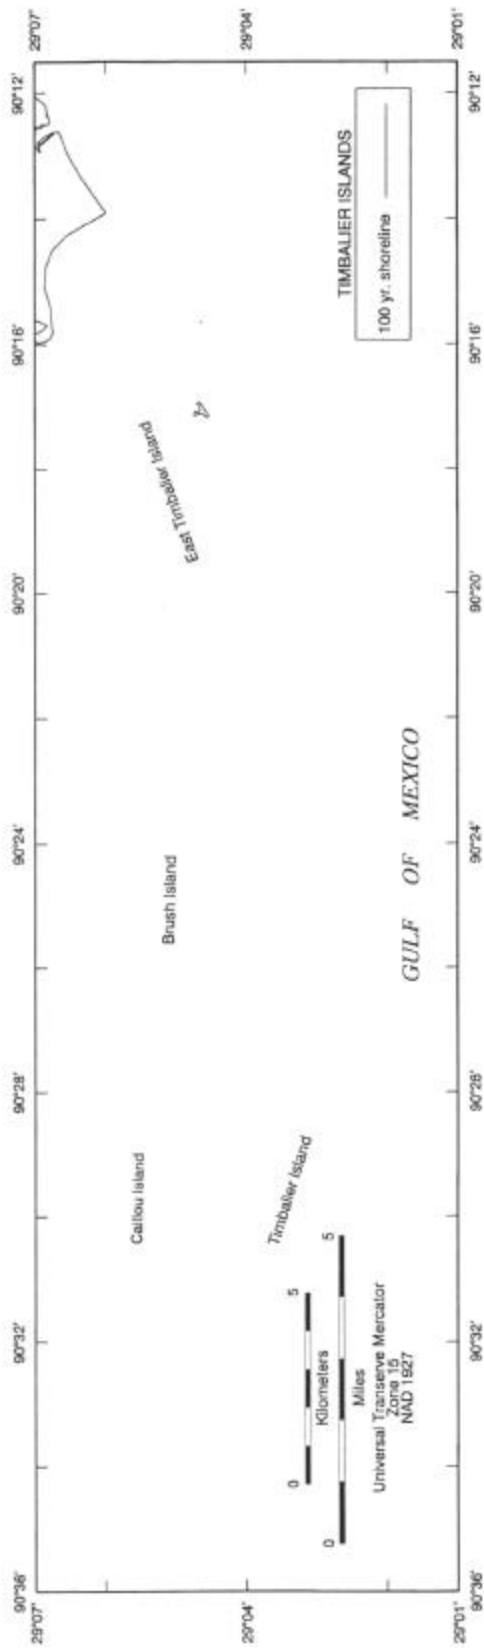

Figure 2-8. Timbalier Islands shoreline projected 100-years into the future.

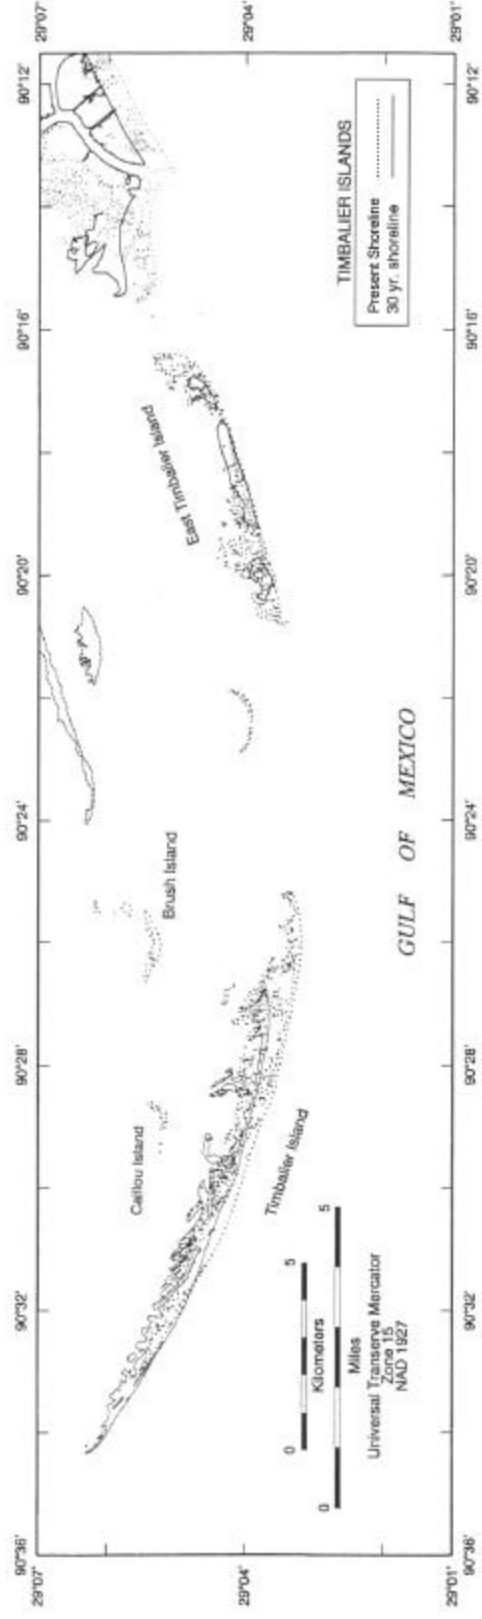

Figure 2-9. Timbalier Islands barrier island system showing 30-year future shoreline superimposed on present shoreline.

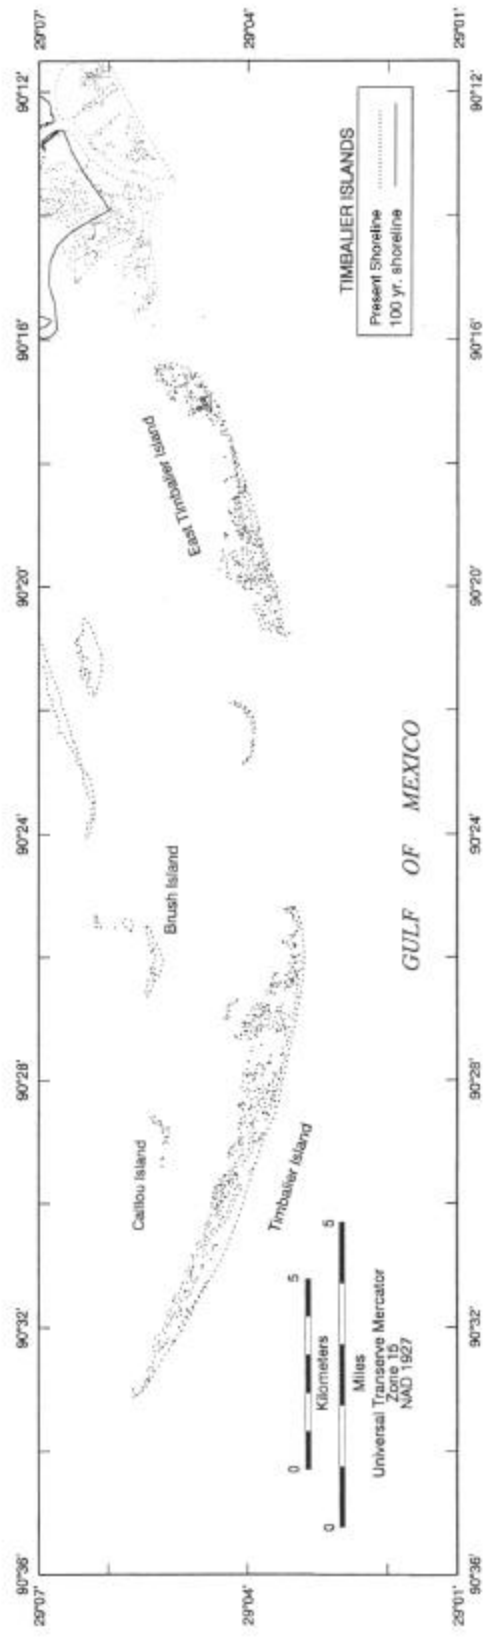

Figure 2-10. Timbalier Islands barrier island system showing 100-year future shoreline superimposed on present shoreline.

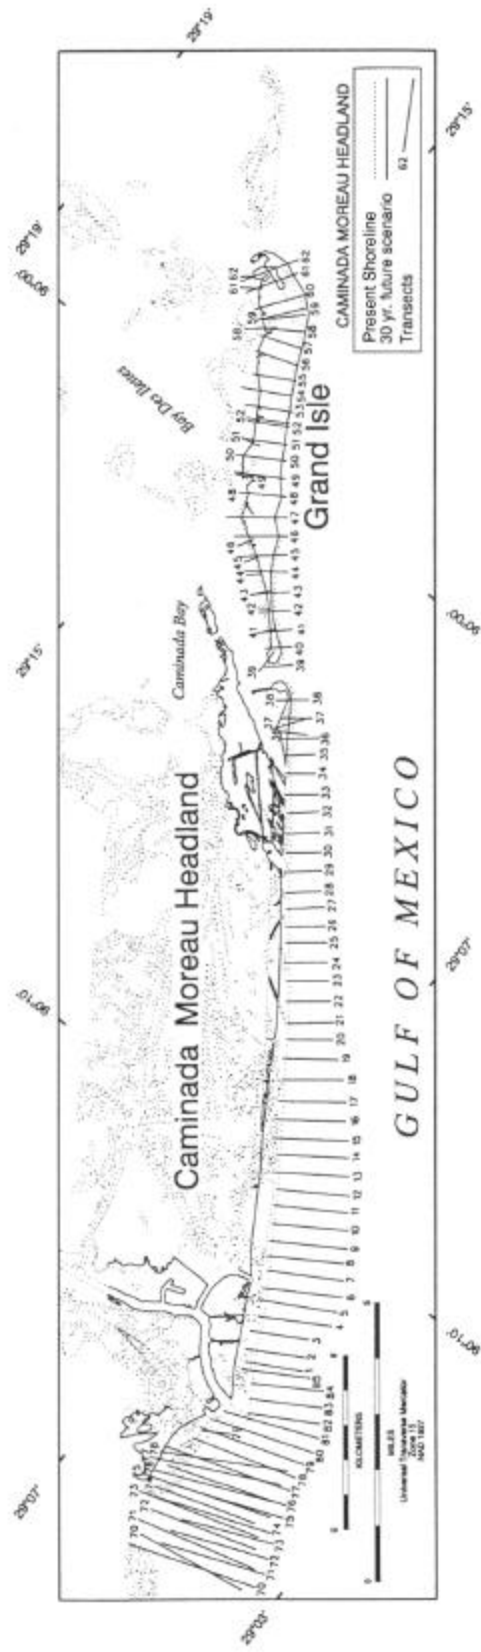

Figure 2-11. Shore-perpendicular transects along the Bayou Lafourche headland/Grand Isle barrier island system.

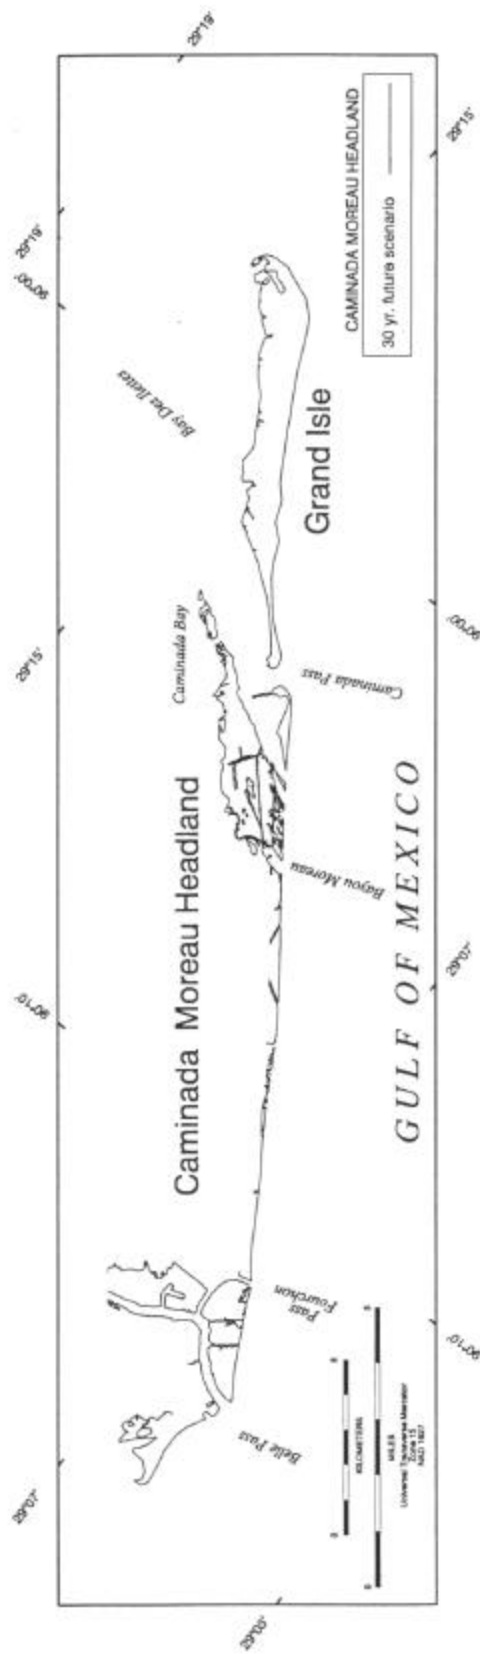

Figure 2-12. Bayou Lafourche headland/Grand Isle shoreline projected 30-years into the future.

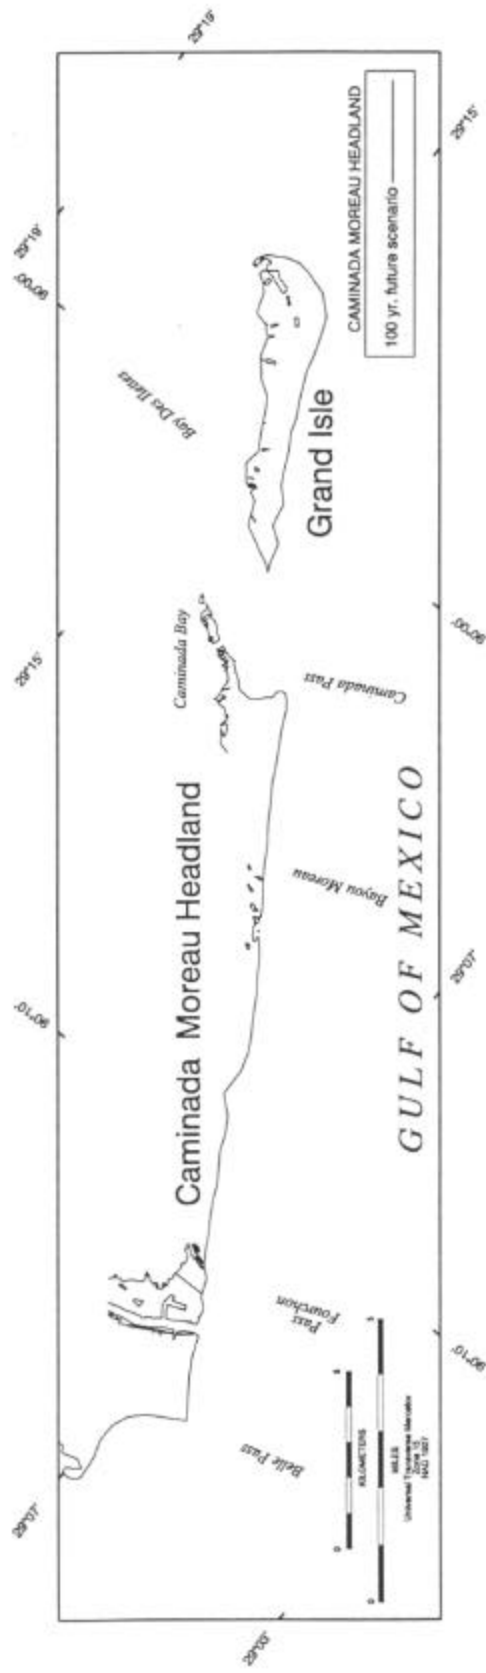

Figure 2-13. Bayou Lafourche headland/Grand Isle shoreline projected 100-years into the future.

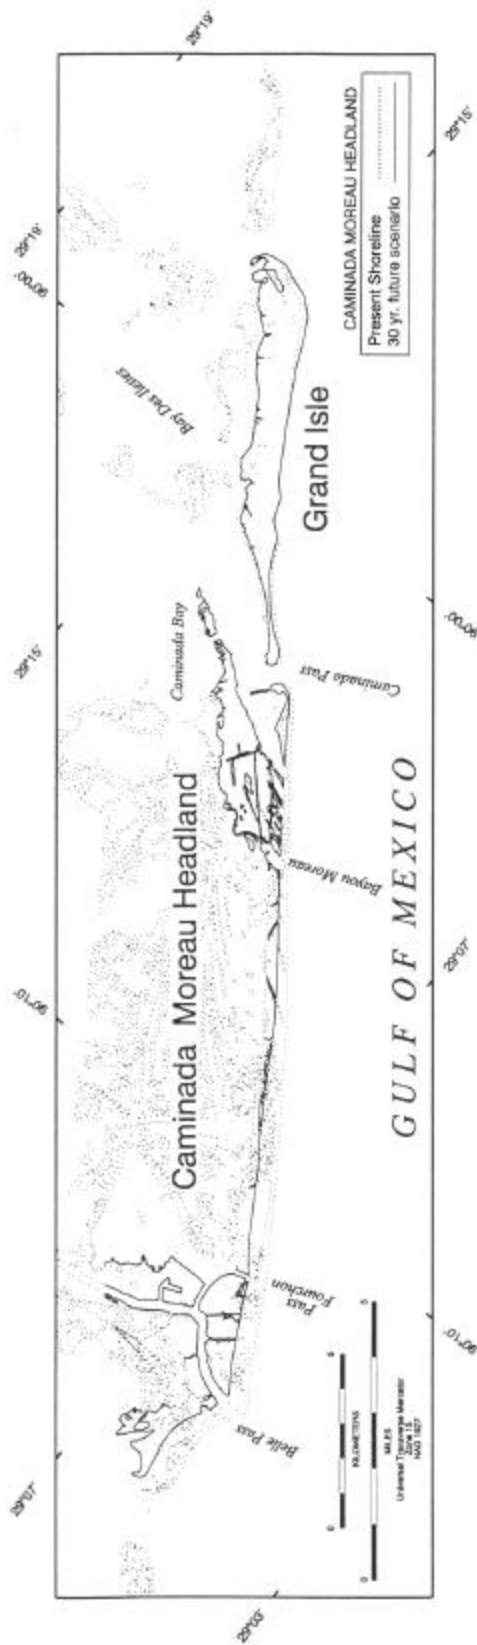

Figure 2-14. Bayou Lafourche headland/Grand Isle barrier island system showing 30-year future shoreline superimposed on present shoreline.

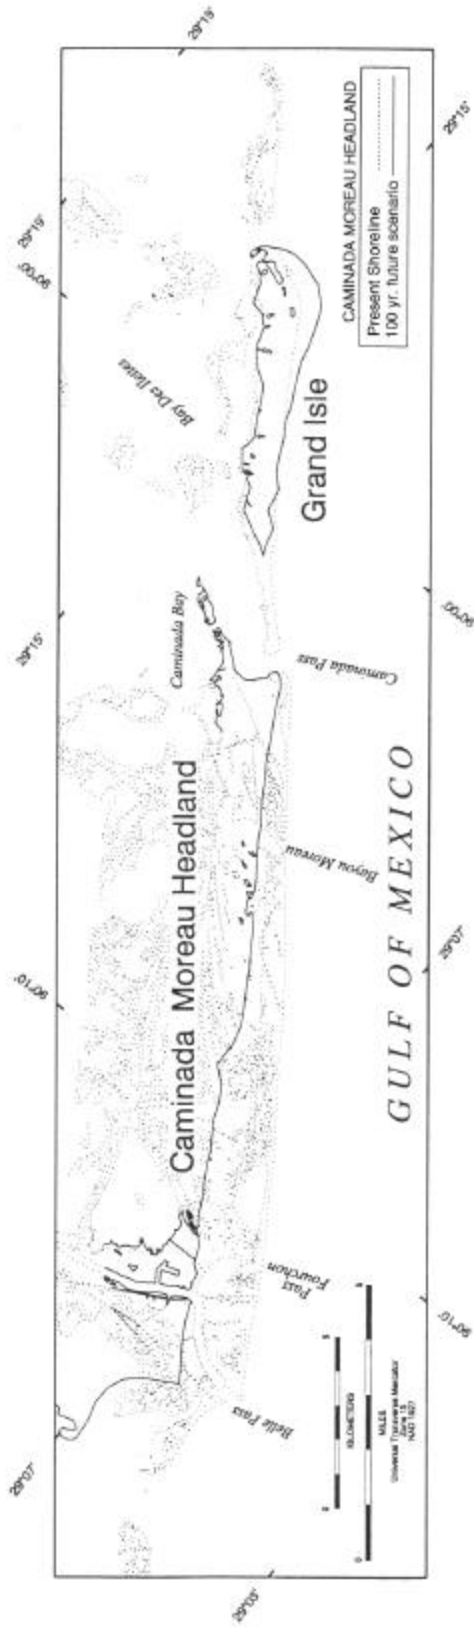

Figure 2-15. Bayou Lafourche headland/Grand Isle barrier island system showing 100-year future shoreline superimposed on present shoreline.

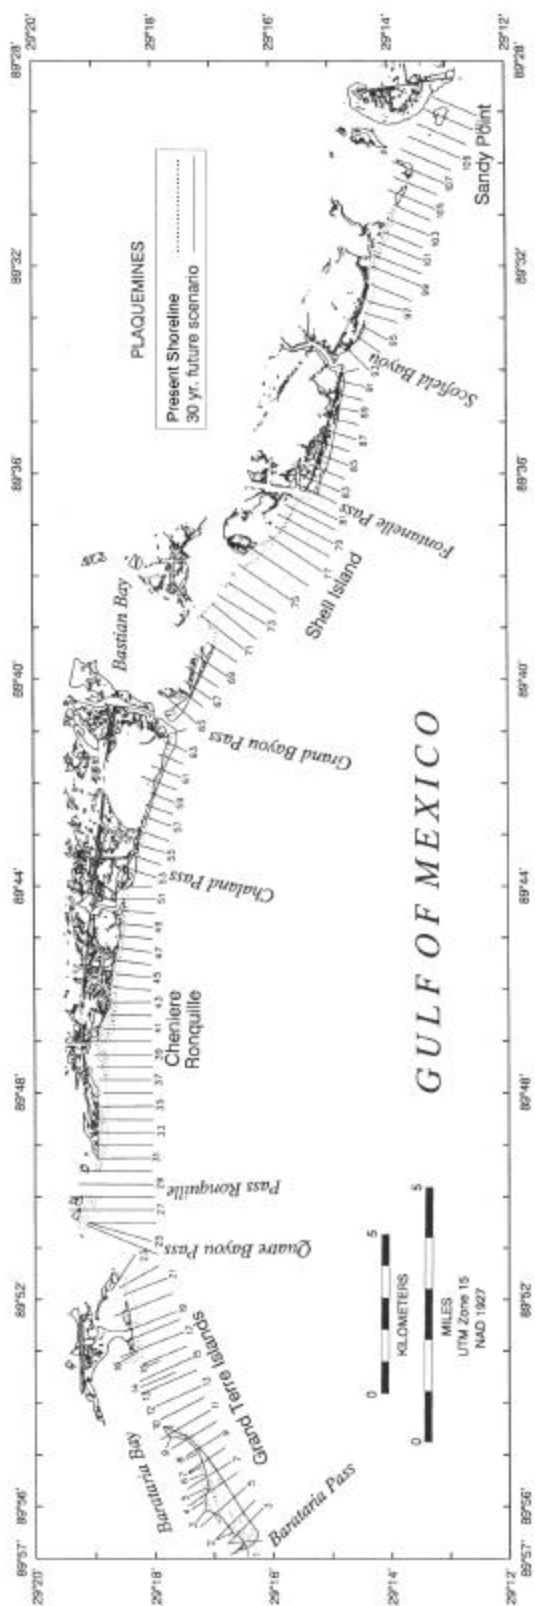

Figure 2-16. Shore-perpendicular transects along the Plaquemines barrier system.

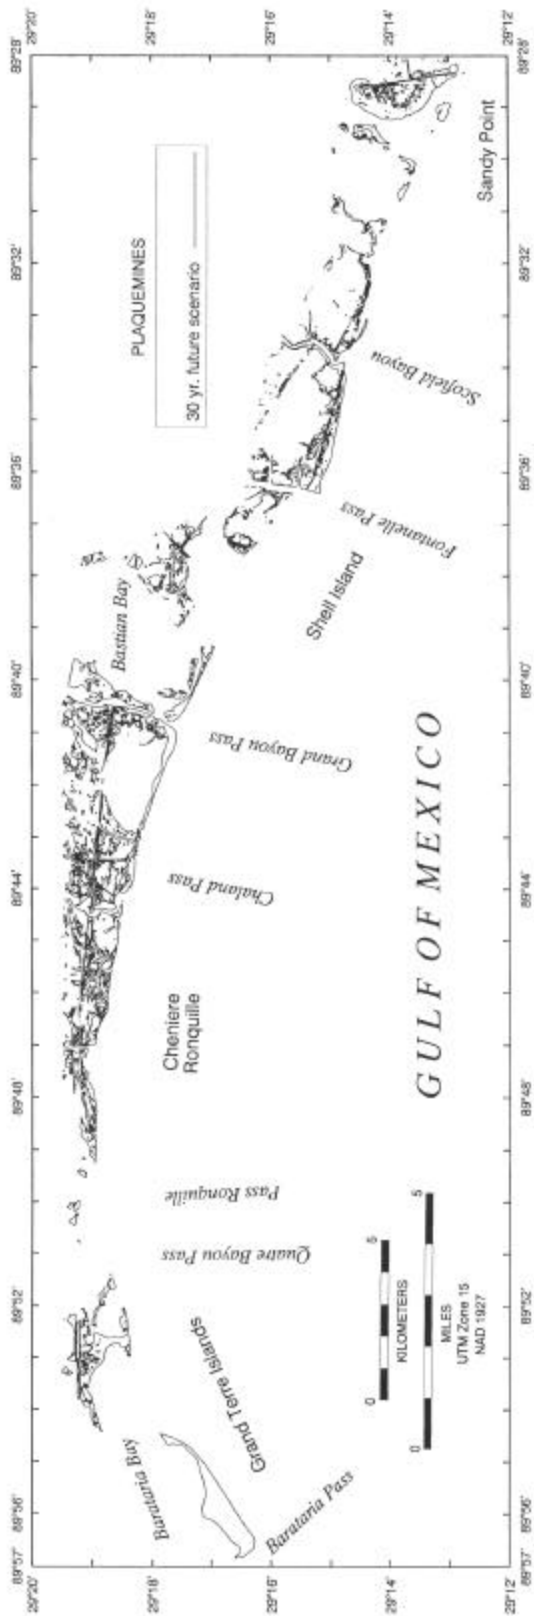

Figure 2-17: Plaquemines barrier shoreline projected 30-years into the future.

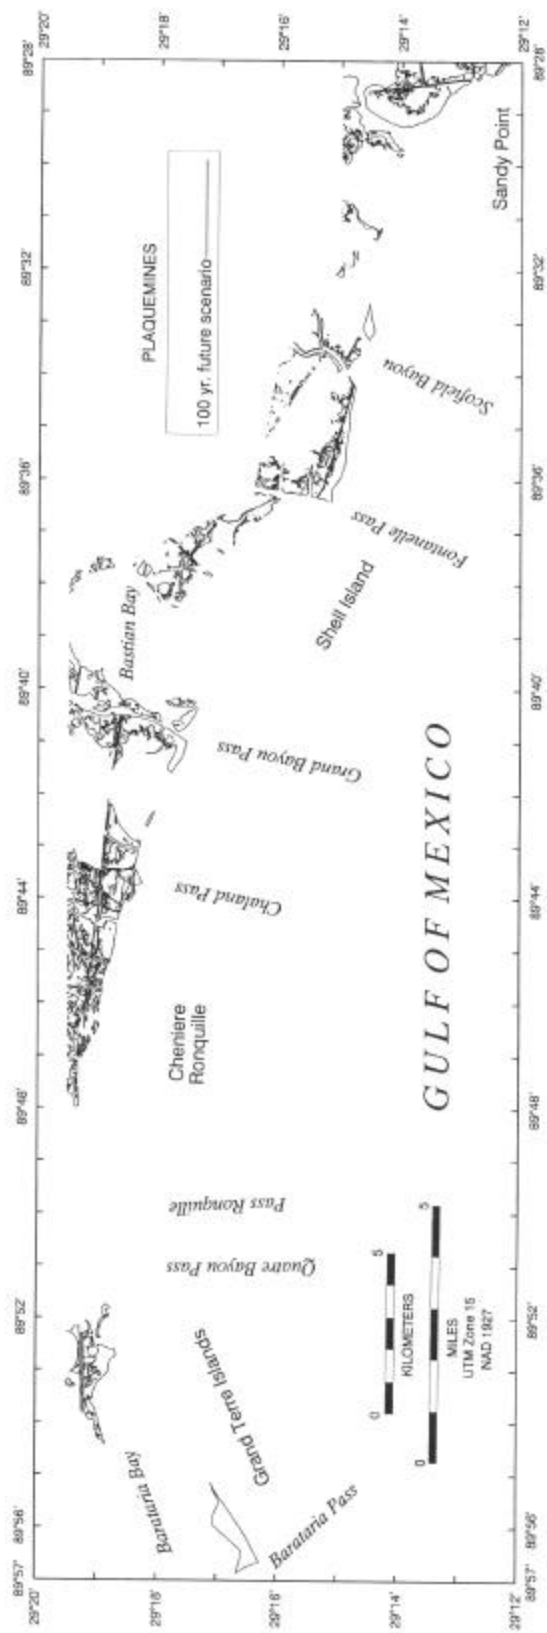

Figure 2-18. Plaquemines barrier shoreline projected 100-years into the future.

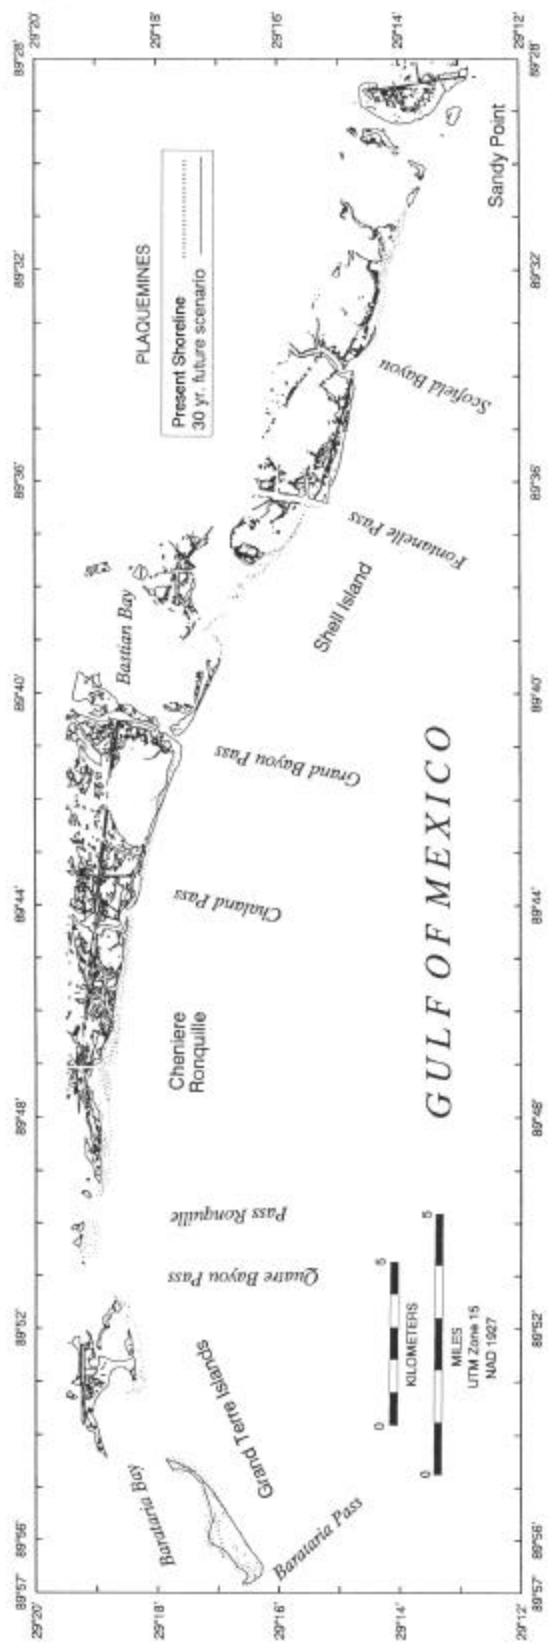

Figure 2-19. Plaquemines barrier island system showing 30-year future shoreline superimposed on present shoreline.

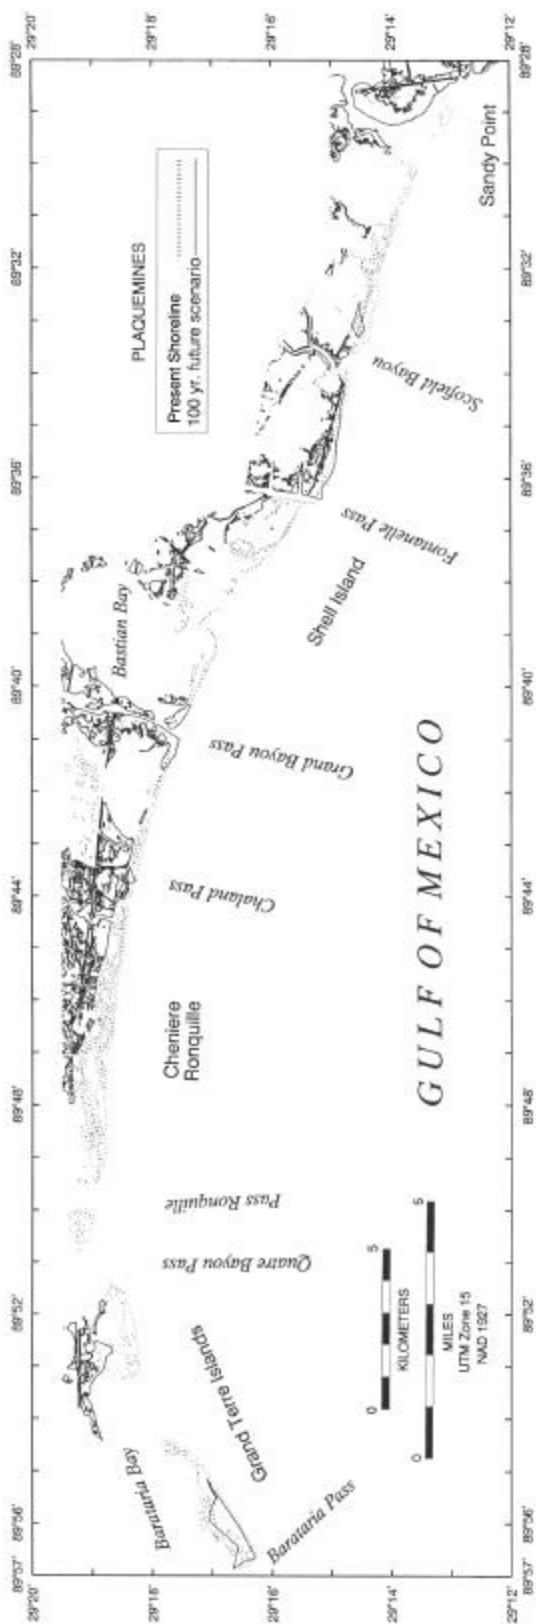

Figure 2-20. Plaquemines barrier system showing 100-year future shoreline superimposed on present shoreline.
